

## Do You Need An Intensive Medicine Review?

Medicine is taken to improve one's health. Yet, side effects and drug interactions are a major cause of disability and death. An intensive drug review from **Medication Management by Design™** is one way to prevent problems before they occur.

### Have you noticed any of these symptoms?

- Have You Noticed A Sudden Decrease in Abilities?
- Have You Noticed Sudden Changes in Behavior?
- Do You Have More Than Two Doctors?
- Are You Going In or Out Of a Medical Facility?
- Do You Take More Than Six Medications?
- Are You Adding or Changing a Medication?

### It Never Hurts to Check

If any of these sound like you, a friend, or a family member, contact us today to arrange an **Intensive Medicine Review**. An Intensive Medicine Review can help you find a way to take the right amount of the right medicine at the right time.

## What does MMD™ do?

- We compare your medications to your medical conditions.
- We assess your medications for drug interactions and toxicity.
- We generate a big-picture overview of the ways in which your medicines affect each other, as well as detailed comments on each drug interaction.

After this process, we will work with you and your healthcare team to get you the most benefit from the fewest number of medications to optimize your health.

**Together, we have 40 years of experience making medications more effective and less dangerous.**
